## System Requirements

### Point Of Sale

	Minimum	Recommended
Processor	1.6 GHz processor or equivalent	I3 processor or equivalent
RAM	2 GB	4 GB
Display	1024 x 768	1280 x 1024
Printers		We recommend using Epson printers
Payment device		We recommend using pinpads instead of card readers.

**Note:** The above display requirements also apply to customer-facing POS displays and kitchen screens.

### Kiosk

	Minimum	Recommended
Processor	2 GHz processor or equivalent	I5 processor or equivalent with discrete graphics
RAM	2 GB	4 GB
Display	1024 x 768	1080 x 1920

### Digital Signage

Before you start setting up **Veezi Digital Signage**, we recommend you do the following:

- Check the resolution of your signs. You'll need to use high-definition ones for the **sign types** to appear correctly.
- Android versions come in a lot of different shapes and sizes, so we strongly recommend purchasing the **Minix Neo U1** and **A2 Lite** remote keyboard. That way you'll be using a device that you can be confident is compatible with our software. You'll need one Minix box and an HDMI cable per TV or sign.

### Usherpoint

A handheld smartphone or tablet device with a camera, running a version of iOS which is supported by Apple.

### Supported Operating Systems

Application	Supported operating systems
POS	<ul style="list-style-type: none"> <li>• Windows 10</li> <li>• Windows 8</li> </ul>
Kiosk	<ul style="list-style-type: none"> <li>• Windows 10</li> <li>• Windows 8</li> </ul>
Digital Signage	Android
Usherpoint	An iOS version supported by Apple

Unless noted, older versions of Windows operating systems that are unsupported by Microsoft are no longer supported by Vista. Unsupported operating systems will affect your ability to apply security patches, which is a requirement under PCI DSS. Running an unsupported operating system will likely affect your PCI compliance.

Embedded versions of client operating systems are also generally supported but must be configured to include any Windows components required by the .NET framework, your hardware peripherals, and your payment system.

#### Notes

If your POS workstations are running an LTSC (long-term service branching) of Windows 10, you'll need a minimum version of 1607, as prior versions don't support .NET Framework 4.8, which is required for POS.

### Windows Feature Requirements

#### .NET Framework Requirements

Computer role	.NET Framework version
Kiosk	3.5sp1, and 4.6.2 or above
POS	3.5sp1, and 4.7.2 or above

### Payment Providers

Veezi supports various integrated payment providers in each region. Contact us to find out which are available for you.
