

Cinema Reopening Kit

Here at Veezi, we know keeping your moviegoers and staff safe, healthy, and happy when you reopen is your priority. Helping you do so is ours.

Check out some awesome new features and curated tools for you to adapt your cinema and deliver the coolest, smoothest, most social distancing-friendly experience possible.

Social-Distance Seating

Ensure **social-distance seating** across all sales channels with the smartest dynamic seating solution that automatically forces one or two gap seats between each booking.

We make it easy to keep your moviegoers healthy!

Contact Tracing

Collect name, phone number, and email address if required by authorities for contact tracing purposes across all sales channels.

If needed, easily extract moviegoers' contact details and seats for each screening.

V-Tix Internet Ticketing

Encourage booking from home and enhance a **seamless and contactless moviegoer journey** with our high-performance, mobile-responsive, **online ticketing solution**.

Long lines to exchange tickets and cash are a thing of the past!

Kiosk

Allow **self-service** tickets and concessions sales by turning your existing POS terminal into a Kiosk in order to minimize lines and direct contact, and to reduce staff requirements so employees can work at safe distances from each other behind the counter.

UsherPoint

Ensure **contactless ticket redemptions** by using our free **UsherPoint** app to scan digital and physical tickets from any iOS device.
